

PolyWorks®

PolyWorks/Inspector Probing™ Package

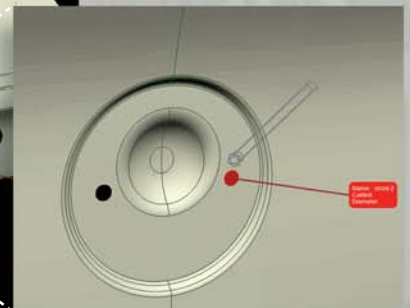

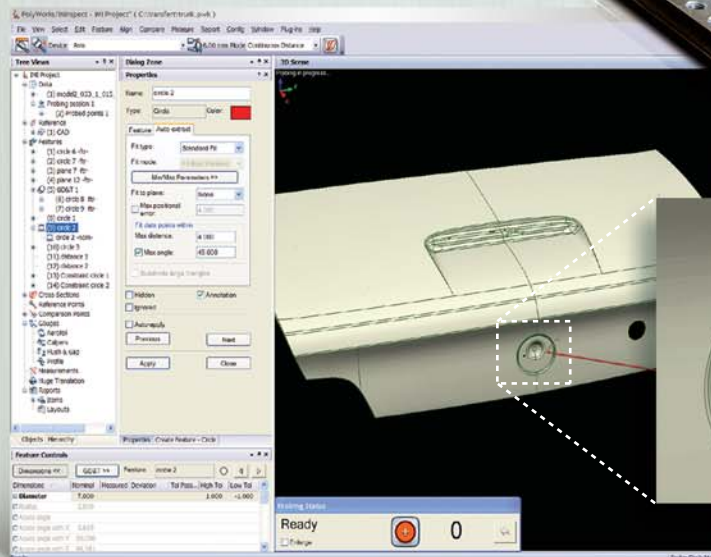

The leading point cloud engineering solution now available for interactive probing devices

PolyWorks/Inspector™ is renowned for its capability to combine point cloud 3D digitizing with traditional hard probing metrology. InnovMetric Software now introduces PolyWorks/Inspector Probing™, a new package specifically dedicated to interactive probing metrology applications.

PolyWorks/Inspector Probing offers:

- Standard probing tools: alignment to CAD, probing of features and cross-sections, comparison to CAD surface and boundary, customizable reports, and more
- Unique probing functionalities including configurable flush & gap and profile gauge probing
- Free IGES, STEP, and STL translators
- Free plug-ins for a wide range of arm-based and hand-held probing devices, photogrammetry-based devices, and laser trackers

PolyWorks/Inspector Probing handles up to 100,000 points.

Built on a Proven Technology

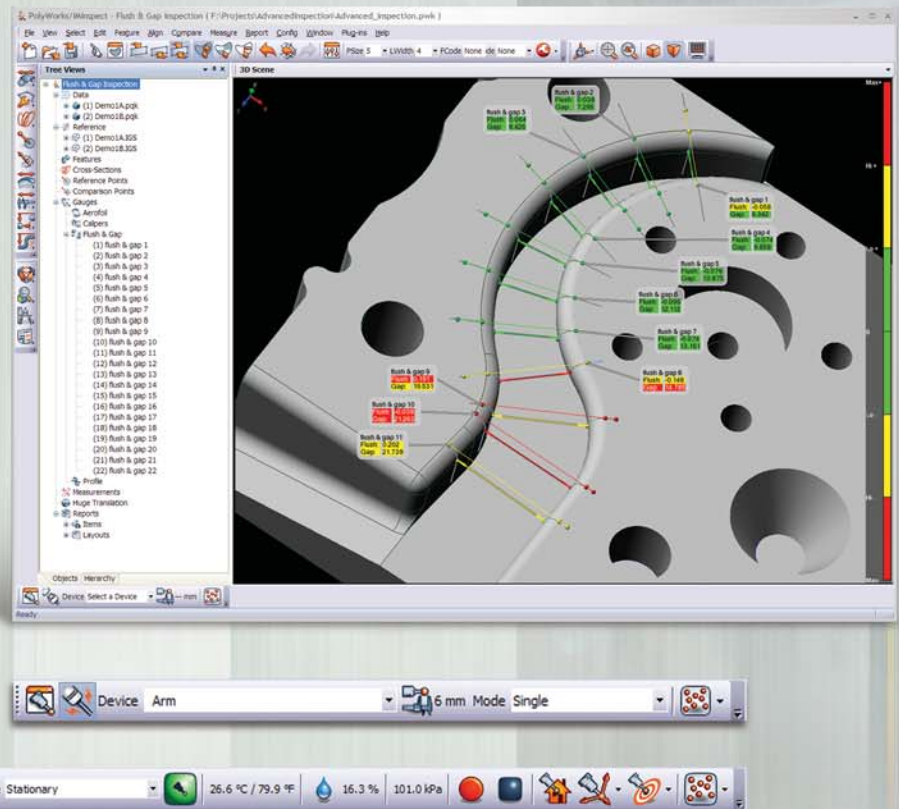

InnovMetric Software has the largest installed customer base of high-density point cloud engineering software in the manufacturing community worldwide.

Leading-edge automotive and aeronautic OEMs such as BMW, Boeing, Daimler-Chrysler, Ford, GM, Honda, Rolls-Royce, Toyota, and Volkswagen, and their suppliers, use PolyWorks in their daily point cloud digitizing, dimensional analysis, comparison to CAD, and reverse-engineering tasks.

The PolyWorks Advantage

PolyWorks/Inspector Probing offers unique benefits to its users:

- Easy upgrade path to the complete PolyWorks point cloud engineering solution
- A completely customizable Xtreme user interface platform that allows customers to quickly define their own visual layouts, including very simplified interfaces for their shop floor users
- Re-engineered process workflows that deliver optimum performance in terms of user operations
- Free viewer for sharing inspection results among users, managers, and suppliers
- Best after-sales support in the industry
